CLEANING THE ENVIRONMENT NATURALLY

FirstBIO™ Quik-Fix

For Fast Control of Ammonia & Nitrite . . .

Much More than just “Nitrifiers”.

If you are a Tropical Fish Exporter/Importer or Re-Seller than you know the importance of maintaining healthy water conditions for your investment and anything that can keep water healthy is vitally important because sick and/or dead fish aren't good for your BUSINESS!

If you are having Nitrification problems then **FirstBIO™ Quik-FIX** can solve them in as little as 24 to 72 hours and keep them from re-occurring.

FirstBIO™ Quik-FIX

- Is the first product which is NO longer dependent on Nitrification to quickly reduce Ammonia & Nitrite. No More waiting or lag times.
- No longer need to stabilize water conditions to establish nitrifying populations to start the “Nitrification” Cycle.
- Is a new innovative natural biological product very different to any currently available product because in just 24 to 72 hours it can completely control Ammonia & Nitrite levels.
- Works differently than all other nitrifying bacteria products because it is the only product to incorporate “*extremophile*” natural Class “1” microorganisms capable of converting Ammonia & Nitrite without waiting for the nitrification cycle to start.
- “*Extremophile*” microorganisms can operate in a wide range of normal and hostile water conditions and are bio-synergistic having the ability to significantly improve the biological action of other bacteria operating within the processes.
- The result of more than 5 years intensive product development, Bio-Industries Ltd. is the only company to have developed a production process for producing commercial quantities of these microorganisms specifically for this application.
- Already successfully used in Aquaculture applications.

The page is decorated with numerous water droplets of various sizes, some with soft shadows, scattered across the white background. The logo for Bio-Industries Ltd is centered at the top. It features the word "BIO-INDUSTRIES LTD" in a bold, blue, sans-serif font. The letter "O" in "BIO" is replaced by a blue water droplet with a white highlight. Below the main name, the tagline "CLEANING THE ENVIRONMENT NATURALLY" is written in a smaller, green, sans-serif font.

CLEANING THE ENVIRONMENT NATURALLY

Now Fish Sellers can get faster control of their water conditions while maintaining healthier inventories with a very cost effective solution.

Usage rates are based on water volume or filter capacity. Simply adds to the water or the filter once, then every 30 days or whenever Ammonia may rise.
